

Eagle Conferencing Offers Subscribers Free Conferencing to U.K.

Run audio conferences between India and Britain without international call charges

London, Bangalore – March 16, 2010 – Eagle Conferencing (www.eagleconferencing.in and www.eagleconferencing.co.uk), in a significant move, has introduced a new offer to subscribers providing free conference calls between India and the U.K. This groundbreaking and aggressive pricing design allows organizations registered with Eagle Conferencing to conduct audio conferences with business partners or family members within India and the U.K. without incurring international call charges. With this unique service, millions of Indian consumers who want to conference with counterparts in the U.K. can enjoy a call experience with an unmatched voice quality that has never been possible before.

This service eliminates expensive international call charges and is available to all existing customers, as well as to new customers, as a part of their service package. There are no additional costs for this international conferencing feature!

Eagle Conferencing provides access to audio conference call capabilities that support calls for up to 25 participants. The conference moderator has access to a full range of call management facilities and award-winning, state-of-the-art conferencing services. Sign up online at www.eagleconferencing.in or www.eagleconferencing.co.uk .

In an effort to re-define the future of the Indian telecom sector, this significant development is part of an overall commitment to provide customers with quality service and global reach. Eagle Conferencing offers consumers a bouquet of global telecom value-added services. India's currently expanding market has inspired us to transform industry dynamics and reinvent economic models.

Eagle Conferencing, with almost a quarter of a century of global infrastructure and an operations experience of over 10 billion annual minutes of calling traffic capacity, is one of the global leaders in conferencing services. The conferencing solutions provided by Eagle Conferencing have been instrumental in forming the communication backbone of the entire switching and transmission communications value chain. Providing an inexpensive global bridge facility between India and the U.K. supports the communication delivery structure which has contributed towards strengthening economic and social development in India.
